

THE ABCs OF CREDIT CARD FINANCE - 2011

A Student Credit Card Literacy Program

For years, the Center for Student Credit Card Education, Inc. (CSCCE) has offered a free credit card literacy program, "The ABCs of Credit Card Finance," which has been very popular with Indiana teachers. The program has a target audience of high school juniors, seniors and college freshmen and teaches students how to wisely choose and responsibly use a credit card.

Now the curriculum is available online at www.theabcsofcredit.com. PDFs for the student primer, Trainer's Guide and PowerPoint Presentation are downloadable and the course has also been converted to one that is animated and interactive and can be taken independently by students online. Therefore, the program is now available in two formats. As usual, there is no charge for either format.
